SUMMARY

Data Science and AI Specialist with experience in Exploratory Data Analysis (EDA), predictive modeling, and Large Language Models (LLMs). Proficient in orchestrating data pipelines and fine-tuning open-source models. Seeking advanced AI/ML research and engineering roles to build scalable intelligent systems.

SKILLS

- AI/ML: Machine Learning, Deep Learning, NLP, LLM Fine-tuning, RAG Architecture
- Frameworks & Tech: Scikit-learn, Hugging Face, Vercel AI SDK, NumPy, Pandas, Matplotlib, Power BI, Git, GitHub
- Languages: Python, SQL, C++, Java, C, PHP, JavaScript, LaTeX
- Core Strengths: Statistical Modeling, Predictive Analytics, Exploratory Data Analysis (EDA)
- Languages Spoken: French (Native), English (Intermediate B2)

WORK EXPERIENCE

Artificial Intelligence Intern — Data Analysis & Modeling

ALITCHA | February 2024 – August 2024 | Arconville, Benin

- Conducted comprehensive EDA on a dataset with 17+ core features and 20,000+ data points to extract insights.
- Utilized cloud environments (Google Colab, Lightning AI) to execute high-performance predictive modeling.
- Delivered technical reports and data-driven presentations to the engineering team to support decision-making.

Data Science Trainee — Advanced Analytics & NLP

Africa Tech Up Tour – iSHEERO | July 2023 – July 2024 | Sèmè City, Benin

- Selected for a competitive 4-month intensive data science training program via OpenClassrooms.
- Engineered and fine-tuned a Hugging Face LLM for text sentiment classification (Positive/Negative/Neutral).

Data Science Scholar — Technical Training

GirlLEAD Women in Data | July 2023 – July 2024 | Remote

- Awarded merit-based access to international data science tracks and tech hackathons via DataCamp.
- Completed training modules covering Python data structures, SQL queries, and ML pipelines.

PROJECTS

Fiscathon — AI-Powered Tax Forecasting System

- Built a tax simulation platform using data modeling to streamline complex fiscal calculations.
- Integrated a conversational AI chatbot to handle financial queries and automated user guidance.
- Secured 1st Place in a national team-based innovation competition.

JSTIM Hackathon — Labor Market Predictive Tool

- Designed a predictive engine to track skill acquisition and labor market dynamics.
- Co-developed a Node.js backend for data processing and API integrations — 1st Place Winner.

EDUCATION

B.Sc. in Computer Science (Software Engineering)

University of Abomey Calavi – IFRI | August 2021 – March 2025

GPA: 14.54/20 ("Mention: Bien" – Equivalent to UK Upper Second-Class Honors) | Mastercard Foundation Scholars Program Fully-Funded Recipient
