SUMMARY

Software Engineer specialized in full-stack web development, secure backend architectures, and relational database systems. Experienced in designing modular code bases and deploying RESTful APIs within modern frameworks. Seeking software engineering roles focused on scalable application design.

SKILLS

- Core Development: Full-Stack Web Development, Backend Architecture, Object-Oriented Programming (OOP)
- Frameworks & Tech: React.js, Laravel, Django, Node.js, Express, Tailwind CSS, Bootstrap, Vercel
- Languages & DB: JavaScript, PHP, Java, C++, C, Python, SQL, HTML5, CSS3, MySQL, MongoDB, Git, GitHub
- Methodologies: UML Modeling, Client-Server Architectures, Software Security, Agile

WORK EXPERIENCE

Full-Stack Web Developer — Platform Engineering

DrwinTech | July 2025 – December 2025 | Cotonou, Benin

- Developed scalable campaign management and user profile modules for AfriMediaX using React.js and Laravel.
- Integrated secure REST APIs and structured asynchronous token-based user session management handlers.
- Architected dynamic web pages using Webflow CMS, establishing reusable custom components and modular layouts.

Full-Stack Developer Intern — Application Maintenance

FUN HIGH TECH | August 2024 – September 2024 | Abomey-Calavi, Benin

- Maintained dynamic database-driven web applications using PHP to deploy secure server-side functionalities.
- Structured front-end user interfaces using HTML5, CSS3, and JavaScript, optimizing query performance in MySQL.

PROJECTS

Mentora — AI-Driven Mentorship Management Platform

- Engineered a complete full-stack platform from scratch to automate academic and professional mentorship pairings.
- Built with React.js, Tailwind CSS, Laravel, and MySQL, with robust role-based access control (RBAC).
- Programmed automated document generation scripts for certificate delivery and administration.
- Academic Context: Bachelor's Thesis project, supervised by Dr. Ratheil V. HOUNDJI.

Node.js Backend Engine — JSTIM Application

- Architected a secure asynchronous backend using Node.js and Express to manage high-traffic API requests.

EDUCATION

B.Sc. in Computer Science (Software Engineering)

University of Abomey Calavi – IFRI | August 2021 – March 2025

GPA: 14.54/20 ("Mention: Bien" – Equivalent to UK Upper Second-Class Honors) | Mastercard Foundation Scholars Program Fully-Funded Recipient
